Technical Assignment – Build a Mini Candidate Job Portal

Jobs Territory currently has a CRM and ATS and is planning to develop a candidate-facing job platform.

Assignment Requirements:

1. Candidate registration, login, and profile management.
2. Job listings with search and filters.
3. Job application and application status tracking.

AI Coding Tools:

You are encouraged to use Codex, Claude Code, Cursor, or similar AI coding tools.

We would like to understand:

- Which AI coding tool you used and why.
- How you structured your prompts.
- How you developed and debugged the application using AI.
- How you reviewed and tested AI-generated code.

Submission Requirements:

- Working application/demo link.
- 2–3 examples of AI prompts used during development.
- Brief explanation of your AI-assisted development approach.

Assignment Deadline: Within 48 hours of confirming your availability.

Important:

Please confirm whether you are comfortable with the WFO internship, office location, and working hours before starting the assignment.

Only candidates who confirm their availability should proceed with the technical assignment.

Once completed, please share your submission by replying to this email.

Best regards,
Hiring Team
